

Flow cartridge

REPLACEMENT CARTRIDGES / ACCESSORIES

PRODUCT-NO.: 222316

The Flow water filter pitcher provides high quality drinking water by using a hollow fibre membrane to filter out bacteria. High grade carbon material improves the taste of the water and silver ion technology prevents the growth of bacteria inside the cartridge to keep it constantly fresh. With a compact design that will fit perfectly in your fridge and a lifetime indicator, the Flow water filter pitcher provides you with better tasting drinking water and maximum convenience.

The main features

One of the few pitchers with ultrafiltration for bacteria removal

Safe to use with municipal water for direct consumption

Can be kept in the fridge for a more refreshing effect

Portable – take it with you anywhere

Compact and versatile, suitable for small households and kitchens

Water from the pitcher is ideal for boiling to make tea, infant milk or to sterilise baby bottles, as it reduces limescale deposits

Type

Flow cartridge

Part no.

222316

Installation information

Please ask your local power supply utility or a registered electrician to install appliances that are not fully wired, i.e. ready to plug in. The electrician should also be able to assist you with obtaining the agreement of the respective power supply utility required for the appliance installation.
